

3-Phase Series

for Delta & Wye Connections

UL File No. E62459 (All Models)
 CSA File No. LR49272 (All Models)
 TUV File No. R70157 (All Models except 60A)

Applications

The 3-phase filters are designed to reduce interference in equipment with balanced or unbalanced loads. Wye and Delta designs satisfy the connection requirements of these power distribution systems. In addition, L and T circuit configurations are provided for high- and low-impedance loads. A 100μH inductor is included in the ground circuit to provide ground current isolation.
